

Dr. Markus Kaulartz

Dr. Markus Kaulartz is a lawyer at CMS Germany and focuses on matters in the field of IT law, IT security law and data protection. As a former software developer, he combines technical and legal know-how and therefore advises at the interface between technology, business and law. He specializes in legal issues relating to future technologies and new business models, such as artificial intelligence (AI), industry 4.0, FinTech, internet of things and big data. With his special legal and technical expertise on blockchain and smart contracts, he has already consulted various token sales (ICOs) from the initial idea to the final product. He reviews the code of smart contracts for legal compliance and drafts and negotiates extensive blockchain operation agreements. He is the author of the Blockchain Arbitration Rules and is currently establishing an arbitral institution to make arbitration proceedings attractive for technically complicated mass proceedings.
